

# Checking Your Child's Lexia Minutes

When your child logs into Lexia, his or her progress for the week will show up on the home page. You will be able to see how many minutes your child has worked this week (yellow arrow) and what their target goal is for the week (red arrow). *At the beginning of the year, the program will default to a goal of 40 minutes for the week. As your child works in the program, this goal will update on the first of every month based on his/her progress. Our first update will be on October 1<sup>st</sup> because students weren't in the program long enough in August for there to be enough data collection to set personalized goals for students.*
